

## Aquarius

Aquarius is a videoslot game with regular gameplay and two bonus games. The slot contains 5 reels, 3 rows and 25 pay lines. All the lines are active during each spin and there is no available option to lower the number of pay lines. The coin value (bet) is per pay line, so multiply the bet per pay line (25) to calculate the total bet.

Prizes are won when at least 3 similar symbols show up in succession on a pay line (left most to right).

### Gameplay

First determine the bet, which can be increased or decreased by using the + and - symbols. There is no 'Max bet' or 'Autoplay' option on Aquarius. Start the spin by pressing the spin button.

The duration of the spin can be shortened by pressing the spin again (before the reels stop spinning). When the reels stand still the winnings will show up. The number of coins won will be determined by the symbol and by how often that symbol showed up. Each symbol has its own value.

The coins won will be multiplied by the bet per pay line. This is the amount won on the pay line. Because there are 25 pay lines, there can be won on more than one pay line per spin. The payouts per symbol can be found in the pay table via the 'i' (information) button. Note: only the highest amount won per pay line will be paid.

### Wild symbol

Aquarius' Wild symbol is an extended Wild symbol. The Wild symbol may show up as one symbol but can appear vertical on all symbols on a reel as well.

Double/  
Quadruple  
game

### Double / Quadruple

After a win, the amount of money that has been won during the spin can be doubled or quadrupled. Open the game via the button just above the winnings.

In this double/ quadruple game a card will be drawn. Bet the winnings on a specific colour or suit. When the card shows that specific colour or suit, the winnings will be doubled/quadrupled. After a win the player can choose whether he wants to collect the winnings or to bet again. When the player chooses to bet again, a new card will be drawn.

When another colour/symbol shows up, all winnings will be lost. There is no possibility to bet a part of the winnings in the double

or quadruple game.

### Bonusgame

The bonus game (image left) appears when three bonus symbols (image right) show up in succession on a pay line from left most to right. The bonus is a so called take-or-risk bonus game. There are three chances to take a prize. When there are no chances left, the

coins won on the last hit will be added to the account.

### Collected bonusgame

After collecting 200 'drops' the collected bonusgame appears. The game offers ten free spins on a 3 reel slot with 9 pay lines.

To check the symbol's value just look at *bonus spins* in your "payout overview" which you can find through the 'i' (information) button.

In the figure the value of the bet is shown as 'point value'. The point value will be the average of the value of the bets used to collect the bonus game. When there are no more free spins left the bonus game ends and the amount won will be collected.

### Free spins

When three or more scatter symbols appear, five free spins will be given. The bet value of the free spins is equal to the bet value of the spin on which the free spins have been won.
