

Benny the cat

Benny the cat is a videoslot game with regular gameplay and an extended Wild symbol. The slot contains 5 reels, 3 rows and 20 pay lines. All 20 pay lines will be played every spin. There is no option to lower the number of pay lines. The coin value (bet) is the bet per pay line. Multiply the bet by the number of pay lines (20) to calculate the total bet.

Prizes are won when at least 3 similar symbols show up in succession on a pay line (left most to right). Each symbol has its own value. To check the symbol's value just look at your "payout overview" which you can find through the PAYTABLE button.

Gameplay

First determine the bet. Bets can be increased or decreased by using the < and > symbols at 'BET'. The bet as shown at BET is the bet per pay line.

The number of pay lines is also visible at Benny the cat but can not be changed. Therefore the total bet is always the bet per pay line multiplied by 20. Once the bet is set the game can be started by pressing SPIN.

Max Bet

The highest possible bet per pay line is € 5,00 and since there are 20 pay lines the total bet would then be € 100,00 (maximum bet). A 'max bet' can be set manually by setting a € 5,00 bet per pay line or automatically through clicking on the "MAX BET" button (right hand side of the bets). The max can be switched off at any moment by decreasing the bet per pay line at 'BET'.

Autoplay

When the Autoplay is active a new spin is started once the previous spin is finished.

Before the Autoplay starts there can be determined when the Autoplay will be stopped. There are a few options to determine when the Autoplay stops. The Autoplay can be set to stop after a determined number of bets, amount of bets, winnings or losses.

Press the Autoplay button to activate the Autoplay. The Autoplay letters will turn green once the Autoplay is active. Turn of the Autoplay by pressing the same button. The letters will turn white again.

Regular game

Choose the bet per pay line. Press spin to start the game. When the reels stand still, the coins won will show up. The number of coins won will be determined by the symbol and how often that symbol has showed up. The coins won will be multiplied by the bet per pay line. This is the amount won on the pay line. Because there are 20 pay lines, there can be won on more then one pay line per spin.

Extended Wild symbol

The Wild symbol substitutes for all symbols except for scatter symbols. Benny the cat offers an extended Wild symbol. When the Wild symbol appears as upper or middle

symbol on one of the reels, the wild will change into an extended Wild. In that case the symbols underneath this Wild symbol will change into a Wild symbol as well.

The Wild symbol gives a free spin except when a spin starts with a Wild symbol on the bottom of the reels, in this case the spin isn't for free. The Wild symbol moves one step down every spin till its gone.

Free spins

When three or more scatter symbols appear on the reels 10 free spins will be given.
