

# Bullseye

Bullseye includes two in-game games; a 'basic game' and a 'top game'. Switch between the games through the green 'choose game' button. The game that is active at that time will light up.

## Gameplay

First choose between the 'basic game' and 'top game' via the 'choose game' button. You can select the bet through the 'choose bet' button. The amount that is being bet influences how many points you will receive for each symbol. For example, with 'bet 5' you will receive 10 credits when the pay line ends up on oranges and with 'bet 10' you will receive 20 credits when the pay line ends up on oranges.

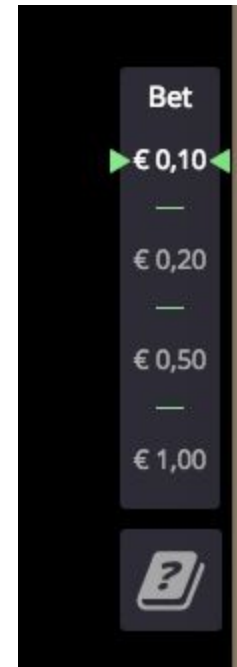

The amount that is being bet from your bonus/cash balance at that time has green triangles on both sides (see image).

## Basic Game

The 'basic game' contains three reels and one pay line. After a win, the game will offer you the chance to bet your winnings via the 'gamble' button. Press 'reset/collect' after a win to collect the credits without playing another gamble game.

## Crowns

The reels in the 'basic game' contain crown symbols. When two or more

crown symbols appear anywhere on the reels, a mystery jackpot worth between 2 and 200 credits will be given.

## Top Game

The 'top game' has three reels and five pay lines. You can select the bet through the 'choose bet' button. The amount of bet influences how many points you will receive for each symbol. For example, with 'bet 5' you will receive 10 credits when the reels spin oranges and with 'bet 10' you will receive 20 credits when the reels spin oranges.

## Bullseye Bonus Game

When three Bullseye symbols show up in a pay line, the bonus game can be rewarded. In the bonus game, the game randomly 'shoots' a prize on the pay table.

Return To Player (RTP)	
Basic	94.59%
Top (BET 5)	97.28%
Top (BET 10)	96.48%
Top (BET 20)	97.04%
