

Dragonsgold

Dragonsgold is a videoslot game with regular gameplay and a moving wild symbol. The slot contains 5 reels (3 rows and 20 pay lines). All the lines are active during each spin and there is no available option to lower the number of pay lines. The coin value (bet) is per pay line, so multiply the bet per pay line (20) to calculate the total bet.

Prizes are won when at least 3 similar symbols show up in succession on a pay line (left most to right). Each symbol has its own value. To check the symbol's value just look at your "payout overview" which you can find through the 'i'(information) button. Only the highest win per pay line will be paid.

Gameplay

First determine the bet, which can be increased or decreased by using the + and -symbols in the bottom right hand corner. The Coin Value is the bet per pay line or *bet*. The total bet is shown above the bet.

The bottom left hand corner shows the balance and the amount won in the previous spin. There isn't a Max-bet or Autoplay option in Dragonsgold. Start the spin by pressing the spin button.

Wild symbol

The Wild symbol at Dragonsgold is a Moving Wild symbol. When the Wild symbol appears as an upper or a middle symbol the Wild will move down and will activate a free spin. The Wild activates free spins till it has reached the bottom symbol of the reel.

When the next spin is free ' 1

Free' shows up on the right hand side of the spin button (see image). The Wild symbol substitutes for all other symbols except for Scatter symbols.
