

## Wild Knight

Wild Knight is a videoslot game with regular gameplay. The slot contains 5 reels (3 rows and 20 pay lines). All the lines are active during each spin and there is no available option to lower the number of pay lines. The coin value (bet) is the bet per pay line. Multiply the bet per pay line by the number of pay lines (20) to calculate the total bet.

Prizes are won when at least 3 similar symbols show up in succession on a pay line (left most to right). Each symbol has its own value. To check the symbol's value just look at your "payout overview" which you can find through the 'i'(information) button in the bottom right hand corner. Calculate the total winnings by multiplying the coins won by the bet per pay line. Note: only the highest amount won per pay line will be paid.

### Gameplay

First determine the bet, which can be increased or decreased by using the < and > symbols in the bottom right-hand corner (just below the max bet button). The bet is the bet per pay line. At Wild Knight the number of pay lines is always 20 and can not be changed. Therefore the total bet is always the bet per pay line multiplied by 20. Once the bet is set the game can be started by pressing the SPIN button.

### Max Bet

The highest possible bet per pay line is € 5,00 and since there are 20 pay lines the total bet would then be € 100,00 (maximum bet). A 'max bet' can be set manually by setting a € 5,00 bet per pay line or automatically through clicking on the "MAX BET" button on the right hand side of the spin button. Max bet can be switched off by decreasing the bet per pay line again at the bottom right hand corner.

### Autoplay

When the Autoplay is active a new spin is started once the previous spin has finished. Press the Autoplay button to activate the Autoplay. Before the Autoplay starts there can be determined when the Autoplay stops. The Autoplay can be set to stop after a determined

number of bets, amount of bets, winnings or losses.

When the Autoplay is active the button will stay yellow during the spin. Turn of the Autoplay by pressing the same button. When the Autoplay is inactive the button will be grey during the spin.

### **Wild Tunder Gameplay**

When three or more Wild Tunder scatters show up, the Wild Tunder gameplay starts. During this gameplay the Wild Tunder symbols that have been appearing stay on the reels as long as new Wild Tunder symbols show up during the gameplay. When no additional Wild Tunder symbols are added after a spin, the Wild Tunder gameplay stops. Now all Wild Tunder symbols will change into Wild symbols and winnings on all pay lines that are given on the reels at that moment will be paid out. Spins during the Wild Tunder game are free spins. During this game prizes on pay lines will not be paid.

### **Wild symbols**

Wild symbols substitute for all symbols except for Wild Tunder symbols.
